TITLE INDEX TO VOLUME 9

Absys: The First Logic Programming Language—A Retrospective and a Commentary, 1

Completed Logic Programs and Their Consistency, 33

Deductive Synthesis of Solutions for Technological Tasks, 195

Editorial, 139

Efficient Program Synthesis in Computational Models, 159

Fixpoint Semantics for Disjunctive Logic Programs, A, 45

Inference Rules and Proof Procedures for Inequations, 75

Machine Synthesis of Mathematical Theorems, 235

Minimal Consequence in Sentential Logic, 19

Models of Inductive Synthesis, 221

Problem Specification and Program Synthesis in the System SPORA, 141

Propositional Logic Programming and the Priz System, 179

Refutation Search for Horn Sets by a Subgoal-Extraction Method, 267

Representing Knowledge with Theories about Theories, 105
